Projects

University Management System | *java* | **GitHub** **Jan 2026 - Feb 2026**

- Designed a scalable system using object-oriented programming, inheritance and interfaces to manage different roles of students and college tasks
- Ensured high data security through Encapsulation this handles complex data while maintaining an organized and efficient system for data storage
- Applied Multiple inheritance with interfaces and the static and final keywords to ensure memory efficiency and a scalable system

Automated Road Extraction using Satellite Images | *NumPy, pandas, SVM, XGBoost* | **GitHub** **Oct 2025 - Dec 2025**

- Developed an automated machine learning framework to extract road networks from high-resolution satellite images using SVM and XGBoost classifiers.
- Achieved correct road detection in urban, rural, and shadowed regions by applying enhanced image preprocessing and feature extraction techniques
- Enables cost-effective mapping, reducing dependence on commercial software while supporting local authorities in identifying damaged and newly constructed roads

Vocabulary Builder | *Python, ML libraries* | **GitHub** **Apr 2025**

- Deployed a chatbot-based vocabulary web app using Google APIs that delivers 5 new words daily with meanings, examples, phonetics, and pronunciation for continuous language growth
- Added a smart search feature that displays synonyms, antonyms, and example sentences for each word, along with light/dark mode to enhance user comfort by 40%
- Boosted learning efficiency by enabling review of 150+ saved words, and improving accuracy through consistent audio pronunciation support

Training

Java Fundamentals - Programming Language | Skill Stone **Jun 2025 - Jul 2025**

- Completed a structured Java training program, strengthening core programming logic and foundational Object-Orient ed Programming concepts.
- Enhanced Java programs using classes, objects, inheritance, polymorphism, and exception handling to solve real-world problems with clean, modular code.
- Gained hands-on experience in writing optimized Java code, applying OOP principles effectively, improving problem-solving skills

Certificates

Infosys **Aug 2025**

Build Generative AI Apps — *Certificate Link*

Coursera **Nov 2024**

Computer Networks — *Certificate Link*

Technical Skills

Languages: Java, Python, C++

Technologies/Frameworks: NumPy, Pandas, CSS, HTML, GitHub, VS Code

Soft Skills: Problem-Solving, Time Management, Adaptability

Education

Lovely Professional University **2023 – Present**

Computer Science and Engineering — CGPA: 6.3 *Phagwara, Punjab*

Tirumala Junior College **2021 – 2023**

Intermediate — Percentage: 96.2 *Rajamundry, Andhra Pradesh*

Bharatiya Vidya Bhavans **2020 – 2021**

Matriculation — Percentage: 89 *Tadepalligudem, Andhra Pradesh*
